COURSE TITLE (CB02): Pre-Employment Skills/Consumer Training  
Max 68 characters including punctuation and spaces

**COURSE CATALOG DESCRIPTION** -- Provide a brief description of the course, including an overview of the topics covered:

**Checklist:**

- Status (noncredit versus credit or others)
- A content/objective description, a short paragraph (course description) that provides a well-developed overview of topics covered. It should be thorough enough to establish the comparability of the course to those at other colleges and to convey the role of the course in the curriculum as well as to distinguish it from other courses at the college. It should be brief enough to encourage a quick read. To save space, many colleges use phrases rather than complete sentences. For noncredit courses that may lead to credit courses, it is a good idea to consider the catalog descriptions for the common receiving programs or institutions to promote a logical pathway for students intending this route.
- Course type (lecture, lab, activity, special topics, etc.), and contact hours
- Fulfills a certificate of completion, competency or high school graduation requirements
- Ability to articulate or prepare for credit coursework.

Students will acquire conceptual, intra-, and inter-personal skills to prepare them for the world of work. Topics include communication skills, group effectiveness, problem-solving skills, and teamwork while working in "simulated" vocational settings.

**JUSTIFICATION/NEEDS & PURPOSE OF COURSE:**

Enter a brief description of the background and rationale for the course. This might include a description of a degree or certificate for which the course is required or the relationship of this course to other courses in the same or other disciplines. Please note that a justification stating "student need" will not suffice.

Employers are desperately seeking people with a combination of skills that fall under this career readiness and employability umbrella that also include such things as soft skills, customer service skills and life skills.

Lab hours:		
Total hours:	54.00	3.00

How does the repetition of this course meet Title 5, section 58161 requirements? A course may be repeatable when, "course content differs each time it is offered, and that the student who repeats it is gaining an expanded educational experience for one of the following reasons: (A) Skills or proficiencies are enhanced by supervised repetition and practice within class periods; or (B) Active participatory experience in individual study or group assignments is the basic means by which learning objectives are obtained."

- B - Advanced Occupational: Courses taken by students in the advanced stages of their occupational programs. Courses should be offered in one specific occupational area.
- C - Clearly Occupational: Courses generally taken by students in the middle stages of their programs, which should be of difficulty level sufficient to detract "drop-ins." Courses may be offered in several occupational programs within a broad area. The "C" priority, however, should also be used for courses within a specific program area when the criteria for "B" classification are not met. A "C" level course should provide the student with entry-level job skills.

**COURSE CONTENT AND OBJECTIVES** Outline the topics included in the lab portion of the course (*Outline reflects course description, all topics covered in class*). Add more lines as needed.

- The content element contains a complete list of all topics to be taught in the course. The list should be arranged by topic with sub-headings. Content items should be subject based.
- Objectives: (Include Total Hours for each Topic), should be stated in terms of what students will be able to do, should clearly connect to achievement of the course goals, should be concise but complete: ten objectives might be too many; one is not enough, should use verbs showing active learning, theory, principles, and concepts must be adequately covered. Skills and applications are used to reinforce and develop concepts, each objective should be broad in scope, not too detailed, narrow, or specific.

**INSTRUCTION AND EVALUATION**, add more lines as needed.

• **Methods of Instruction** - The focus should be about describing what the students will be doing and experiencing, not only with respect to the instructor, but in some cases with respect to each other and with their environment. The methods of instruction used are appropriate to the objectives. If an objective is to "physically perform," then lecture as the sole method for learning is not enough. The assignments and methods of instruction and evaluation must be appropriate to the stated objectives.

• **Methods of Evaluation** - The bases for evaluating assignments are given, and relate to skills and abilities in objectives. Knowledge of required material should constitute a significant portion of the evaluation as reflected in assignments and methods of evaluation. Please note that while noncredit courses do not produce grades that would be "credited" into a student record, this in no way obviates the critical need for the course design to comprehensively include student evaluation and feedback.

Methods of Instruction	Methods of Evaluation
Oral and written presentation	Develop and deliver a class presentation. Check for understanding by asking clarifying questions. Proofread online and written communication to avoid errors.
Group Project	Collaborate with others on a class project where responsibility is shared and not divided. Ability to handle difficult conversations with peers. Ability to consider other's perspectives before making a decision.
Assigning different leadership roles in group assignments	Ability to take on a leadership role in the group. Ability to demonstrate initiative and taking on additional responsibilities. Ability to motivate team members with a positive attitude and leverage their strengths when delegating work
Develop an action plan with specific steps to solve a problem.	Brainstorm solutions to a problem before bringing it to a supervisor/professor. Ability to follow the action plan and make modifications as needed.
Use a planner or calendar to prioritize work/assignments and meet deadlines.	Reflect on a recent challenge and identify areas of growth and improvement for the future. Ability to review student's social media through the eyes of a future employer and determine appropriateness.
Attend an event that encourages students to step outside their comfort zone.	Engage in conversation with individuals who have different perspectives than their own.
